Global Creativity Initiative

Global Creativity Initiative

Coming Soon!

What is Global Creativity Initiative

Global Creativity Initiative (GCI) is an emerging international organization whose purpose is to seek, archive, celebrate, and share global examples of creativity, related research, innovations, and their motivations. When the first GCI meeting took place at the SOU Creativity Conference in 2022, it brought to fruition attempts to collaborate internationally.

For whom?

GCI is for those interested in discussing, reading and writing about creativity to support a global initiative.

Mission

The GCI is a learning organization whose aim is to share understanding about creativity and innovation across countries and cultures that will create new collaborations, novel research and mutual understanding.

Temporary webpage until we get
GCI website developed
